TECHNICAL + EXECUTIVE

We recruit permanent, fixed term and contracted appointments at all levels, across all Industries.

Permanent Recruitment

Recruitment practice may be the same the world over - you need people, we find people, you engage people.

However, the way in which it is conducted of course will be different. Our difference is a sustainable outcome for the company, the candidate and for the environment. For each successful appointment we plant a tree on your behalf contributing to healthy growth in more ways than one. We intend on building a few forests in and around New Zealand.

Our niche is Energy, Utilities, Infrastructure, Construction and Engineering Professionals and we recruit Director to Assistant positions and everything in between.

Please talk to us about how we do things at Hard Hat Recruits or HH as we are known to our clients as we have the true ability to be a genuine partner to your business - we are here to stay. Please call us on **+64 9 282 3156** to start the process.

Interim, Short term, Contract recruitment

Our current world is ever-changing and we must be flexible in practice. There will be times when you need an additional resource to meet varying and unplanned business needs.

Interim recruitment just got easier, with Hard Hat Recruits. Our fully vetted and pre-qualified contractors are the ideal way to support and manage change effectively, working across anything related to high level Project management to business as usual. The opportunities and challenges in the markets are seriously dictating the movement of professionals in 20/21. Don't be caught out, use our contracting division to provide the talent you require; our teams are recognised to provide high quality specialised outcomes with the minimum of fuss allowing your core business to do what it is best at.

This leaves our clients safe in the knowledge that whatever their recruitment needs are, we have the best person to meet the requirements of the role.

Please have a look at our sister brands: recruitHRpeople and edenfx HSE recruitment.
